

## Case Study

### EOL IT Services helps business securely dispose of their redundant IT equipment

---

ClearView Communications provides integrated electronic and physical security systems for some of the world's most demanding security applications. Its team of designers, project managers and engineers have developed a unique integrated systems approach to ensure that client's critical assets are protected with the most powerful solutions, reducing client's costs and delivering a better user experience. ClearView Communications are based in Chelmsford, Essex.

#### THE FACTS

**Customer:**

ClearView Communications – Provider of integrated electronic and physical security systems.

**Challenge:**

ClearView Communications required help with the disposal of redundant IT and other electronic equipment containing highly sensitive data.

**Solution:**

EOL IT Services provided ClearView Communications with a cost effective, secure and environmentally responsible IT asset disposal service for their redundant IT equipment.

## The Challenge

ClearView Communications required a high end IT service provider to help with the disposal of redundant IT and other electronic equipment containing highly sensitive data.

ClearView Communications needed a solution that was cost effective, secure and in line with all UK and European legislation, including WEEE Directives. In addition, ClearView Communications specified they wanted to cause as little disruption as possible to their working day.

It was critical to ClearView Communications that they find an established company in IT asset disposal, which could take care of all their IT disposal and WEEE requirements.

## EOL IT Services Solution

ClearView Communications turned to EOL IT Services, one of the UK's leading independent IT project management, data security and asset disposal companies.

EOL's designated Project Services Team, with over 16 years' experience in IT asset disposal, were able to provide ClearView Communications with a cost effective, secure and environmentally responsible IT asset disposal service, which included the

removal of redundant IT equipment including PCs, printers and servers.

EOL agreed a removal schedule with ClearView Communications prior to disposal to minimise the workload and disruption to their IT Team.

EOL met ClearView Communications IT disposal requirements as it operates a zero landfill policy and all shredded residue is passed onto certified partners for further refinement.

## Conclusion

Neville Brookes, Technical Manager at ClearView Communications, says that the company has been using EOL IT Services to take care of all their IT disposal requirements since 2006.

"As an installer and service provider of all types of IT and other electronic equipment, we needed to find a way of cost effectively disposing of redundant IT equipment in a legal manner. EOL gave us the solution.

Once we had identified the scrap equipment, EOL do the rest, including providing documentation that satisfies not only our own operating procedures but also those of our customers."

“

**As an installer and service provider of IT and other electronic equipment, we needed to find a way of cost effectively disposing of redundant IT equipment in a legal manner. EOL gave us the solution.”**

- Neville Brooks, Technical Manager at ClearView Communications

### **About EOL IT Services:**

EOL IT Services is one of the UK's leading independent IT project management, data security and asset disposal companies. Operating throughout the UK and overseas, EOL provides a range of bespoke IT services including secure removal and recycling/disposal of redundant IT equipment, data destruction (on and off site) to UK Government CESSG standards and IT delivery or relocation throughout the UK and Europe. EOL is a trusted IT service provider to many leading organisations in banking, law, financial services, healthcare, education and the public sector.
